

**Ben-Gurion University of the Negev**  
**Faculty of Natural Sciences**  
**The Center for Advanced Studies in Mathematics**

**A WORKSHOP ON OBSERVATION AND ESTIMATION**

ORGANIZED BY  
**Paul A. Fuhrmann**

**Sde Boker, July 12 – 16, 2004**

The workshop is devoted to one of the most important areas of control and systems theory, namely that of observation and estimation. The purpose is to bring together leaders in the field in order to explore interconnections between different problem formulations as well as different mathematical techniques.

There is a possibility of partial support for a small number of Ph.D. students and post-docs. Those interested should apply to: [paf@bgumail.bgu.ac.il](mailto:paf@bgumail.bgu.ac.il).  
Additional information about the program is at the workshop site:
