

## **Summer Intern to Solutions, Institutional Advisory at SEB in Stockholm**

SEB's division Large Corporates and Financial Institutions (LC&FI) offers talented students an exciting opportunity to work with banking and finance for a few intense summer months. If you have the ambition, we will support you in growing your potential at SEB this summer!

### **The internship in short**

Your internship starts off with an introduction to SEB and ends with a presentation of your experience to managers, colleagues and other summer interns. As an intern, you will be involved in our daily business activities and have a great opportunity to explore the environment of global trading and commercial banking. You will be guided by at least one tutor during your internship. For more details [www.sebgroup.com/career/graduates-and-students/summer-internship](http://www.sebgroup.com/career/graduates-and-students/summer-internship)

### **What you will do**

Solutions is responsible for product development and advisory and our toolbox includes Portfolio Optimization, Big data, Sustainability analysis and Machine-learning. We are a great team of quants, fund manager analysts, structurers and strategists and ourselves working with risk advisory. Institutional advisory is a subunit of Solutions, a cutting-edge team producing sophisticated investment and hedging solutions to the largest financial institutions. Examples of what we do include risk management, portfolio diversification, hedging and quantitative modelling of sustainable investments.

As a summer intern you will assist in the development and improvement of financial risk and allocation models. You will also analyse and update our yearly review of the asset allocation and sustainability strategies of Swedish life & pension funds. Our models are coded in R and therefore programming is a natural part of the job. Furthermore you will gain a deep understanding of asset and liability management and learn how to address asset allocation challenges, such as diversification problems and hedging/derivatives strategies.

### **Who are you?**

You are analytical, creative and good at simplifying what is complex. You have one year left of university studies in a relevant field after finishing this internship. It is meriting with relevant programming skills. You also have a keen interest in sustainability and a good mastery of the Swedish language.

It is a plus if you can continue working part-time after the internship period. Great people often know great people – please share if you have a friend who would love this job.

**Learn more about working at SEB [www.sebgroup.com/career](http://www.sebgroup.com/career)**

It is our fundamental belief that inclusion and diversity is crucial for our future success. We strive to have an inclusive, value-driven culture where employees feel valued, respected and involved irrespective of who they are, what they believe or where they come from.

### **Welcome with your application**

Attach your CV and a personal letter describing yourself and how you can contribute to SEB. Since we select candidates continuously, feel free to send in your application today, but no later than December 2, 2018. If you have questions about the position please contact Mladen Milutinovic, Institutional advisory, Solutions, phone no +46 70 763 88 51 or by email: [mladen.milutinovic@seb.se](mailto:mladen.milutinovic@seb.se).
